9/13/2025

I am writing on behalf of my patient John Fouts (date of birth 1/31/1979), who has been diagnosed with severe hypersomnia. This is a chronic neurological disorder characterized by excessive daytime sleepiness, sudden sleep attacks and disrupted nighttime sleep. This letter is to support John Fouts request for reasonable accommodations under the Americans with disabilities act (ADA) as he is medically disabled from his various medical conditions.

Hypersomnia significantly impacts John Fouts ability to maintain consistent wakefulness, safety and focus during the day. Specifically, he experiences difficulty maintaining wakefulness particularly during sedentary tasks. His condition substantially limits major life activities. He requires ADA accommodations for housing stability and medical access. Safe and stable housing will be medically beneficial, as repeated displacement exacerbates his medical conditions.

Sincerely,

Warren Shaikun MD
